DESCRIPTION

Suspension appliance with sound-absorbing properties ensured by a peculiar sinusoidal cross-section design of the lower surface and the use of a sound-absorbing material. Acoustic efficiency is ensured within a limited space by positioning at approximately one metre above the head of the speaker and listener. Direct emission: a board with a high number of low-voltage LEDs with rotosymmetrical reflectors ensures maximum lighting comfort. Colour temperature 3000K or 4000 K. Complies with the norms on office activities that involve the use of video-terminals (UGR)
