DESCRIPTION

nh continues the research on the dynamic interaction of experience, details, materials, form, and light that Neri&Hu are pursuing with Artemide. It offers a reinterpretation of the Oriental culture and tradition with a constant contemporary approach. nh is operated intuitively as a reference to the use of lanterns, and allows freedom in creating countless lightscapes. It is an essential, versatile element, suited to illuminate a variety of contexts in a simple and poetic manner. The basic element of nh, a white blown glass sphere with a brass ring, evolves with structures that support it and combine to bring light into space. The selected materials represent a perfect combination of tradition and innovation, as well as the expression of responsible and sustainable design.
