DESCRIPTION

Solar Tree 2.0 has progressed to become a family of modular solutions. Different post heights, and two different heads: these are the structural features to use to put together various configurations to accommodate the needs of urban areas, with solutions that are not only functional but also interactive and energy-smart, to promote a new sustainable and social dimension for the city and for mankind. Solar tree 2.0 has become a smart, latest-generation platform capable of establishing a personal connection with individual users or with smart and "SENSEable" city networks.
