BESCHREIBUNG

Discovery is more and more the perfect synthesis of the values, knowledge, innovative research and know-how of Artemide. The great optoelectronic skills, combined with a thorough culture of design and with technological know-how, produces perfectly transversal and surprising solutions, which translate innovation into the emotion of perception.

Discovery respects the UGR workplace standards in any position in which it is installed.

It breaks away from traditional concepts and preconceived ideas which clearly separate design elements from the more technical performances of systems dedicated specifically to installation in offices and the introduction of colour opens up the way to new applications and scenarios increasingly focused on our well-being and emotions.
