

Pambianco awards Artemide for sustainability

Pambianco celebrated the 15th edition of the "leQUOTABILI20" award and gave Artemide a "special award" recognizing it as the most focused company in terms of **Sustainability**.

It is a transversal award across the different sectors considered by "leQuotabili" and it joins the traditional category awards that in 2020 saw the selection of 40 Fashion companies, 10 Beauty companies, 20 Design companies and 10 Wine companies, as well as giving space to the 5 best small caps of each sector.

On this occasion, it was highlighted how creativity, excellence, intuition and innovation have once again established themselves as the fundamental qualities for Made in Italy companies.

David Pambianco, CEO of Pambianco Strategie di Impresa, comments, "More and more winning the Pambianco leQuotabili award means for companies to have a certification of their ability to produce value."

↗ Scientific research and innovation allow us to rethink the environment and its resources in terms of ecosystem for a better quality of life not only of man but also of the planet.
