Manual skills and technology, experience and research, “know-how” to evolve an idea in a quality product: these are the core values that Artemide shares with Giuntini brand, in addition to its passion for excellence, innovation and versatility.

Artemide illuminates Giuntini office workspaces with a stunning, tailor-made configuration of **A.24 system** that freely and seamlessly runs through the environment, providing general lighting to this elegant open space.

Directly above the work tables, on the other hand, there are suspended **Eggboard**: with their dual function of lamps and sound-absorbing panels, they ensure perfect light on the worktop and an excellent sound level of the environment. Artemide once again delivers a sophisticated and effective lighting solution, to highlight the charm of these spaces without giving up functionality.
