Within the **ONIRICA** suite, designed by **Lombardini22** for the MODE Eco Mood Hotel in Rimini, **Artemide's light** guides guests on an immersive journey between reality and imagination. The visionary atmospheres inspired by Fellini's world find in light a narrative and sensorial element that transforms space and amplifies emotion.

Artemide luminaires, selected for their quality, technology, and sustainable design, interact with the suite's materials and color palette to create poetic, ever-changing scenarios. From the soft glow that welcomes to the play of reflections and accents that surprises, light becomes an integral part of the oniric experience and the design language.

A project that celebrates the harmony between beauty, innovation, and responsibility — values shared by Artemide and Lombardini22 in pursuit of a conscious and emotionally engaging design.
