Artemide

Recovery of the office space and the Ex Canossiane church in Treviso for the construction of the headquarters of CSC+MDA Law Firm.
During the renovation phase, we carefully installed track lines hidden between the beams that compose the ceiling, on which place the **Vector 55**.
The installation of four **Discovery Vertical** in front of the glass wall is very scenic in order to create a luminous filter during the use of the room.

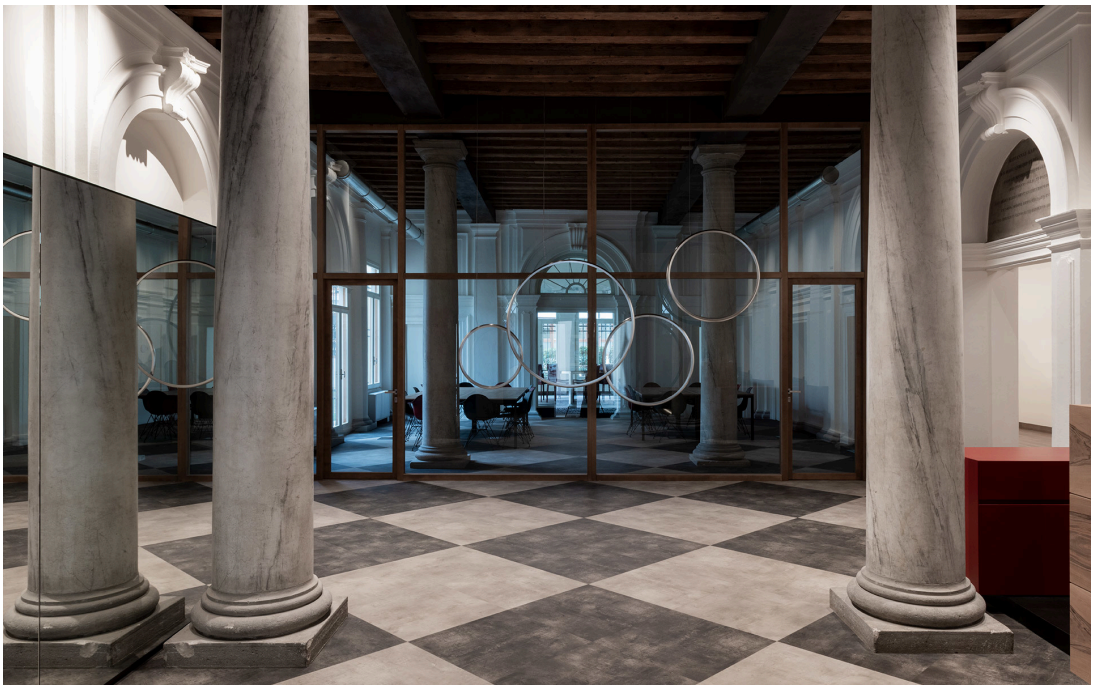

The general distribution of the offices was done with **A.39** and **Everything**, while the operational offices with **Smart Office** and Everything.
The apse of the former church was illuminated with a composition of 10 **Lampada Esagonale**
