Boltons wins at the Archiproducts Awards

We are proud to announce that **Boltons**, designed by **Herzog & de Meuron**, has received the prestigious **Archiproducts Design Award 2026.**
This recognition celebrates a project that explores new ways of interpreting and experiencing light by bringing together **innovation and craftsmanship**.
Boltons combines a **patented optical system** with a transparent glass body, crafted using a traditional glassblowing technique. A lens positioned at the base directs light towards an adjustable metal reflector, allowing the emission to be controlled and modulated.

Artemide

Supported by a magnetic sphere, the reflector invites **a simple, intuitive gesture**: it can be freely tilted, creating **an ever-changing interplay of light, reflections and shadows**.

The light source remains concealed, while the transparency of the glass reveals the precision of the optics, turning illumination into **an engaging visual experience**.

Boltons - Herzog & de Meuron

Boltons - Herzog & de Meuron

With Boltons, **Artemide and Herzog & de Meuron bring together craftsmanship and technological innovation**, shaping a design that invites interaction and discovery.
This recognition affirms Artemide's commitment to research in which optical precision and the quality of materials come together to create new experiences of light.
