

NYCxDESIGN

Artemide is excited to launch new products during **NYCxDESIGN: The Festival** at our showroom in Soho.

The latest designs are the result of technological patented research and of collaborations with outstanding brands and names in the fields of international architecture and design. Values, competence, and manufacturing skills are translated into innovative products that open up new scenarios in the lighting sector.

New products born from the continuous collaboration, synthesis and testimony of vision, research and know-how: an increasingly universal light that interprets "Made in Italy." Artemide collaborates with the most important international architects, sharing important values such as sustainability, central to the perspective Artemide to the future.
