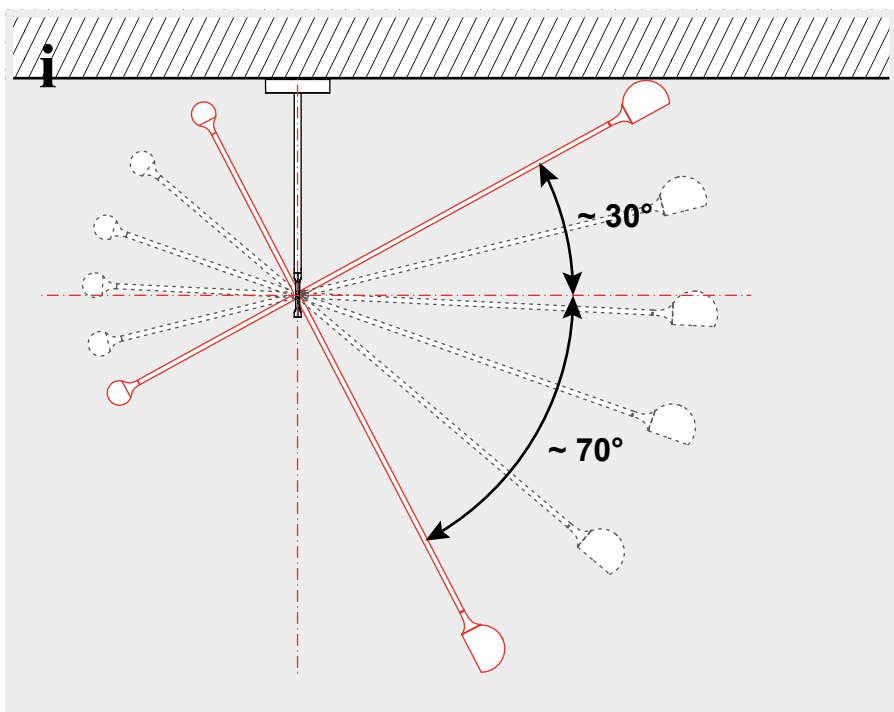

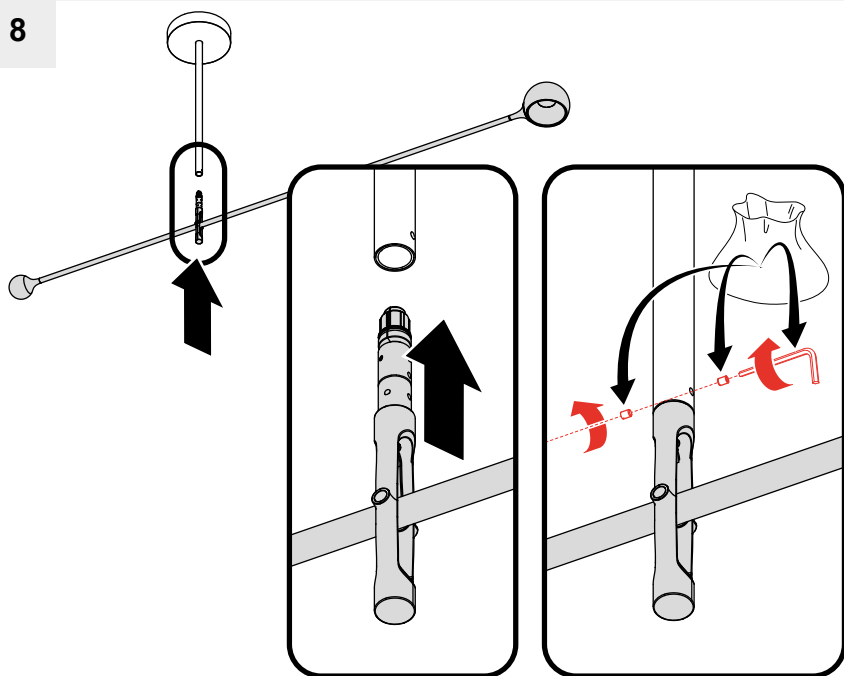

Diagram 6c illustrates the wiring for the lighting system. The diagram shows a power supply unit (PSU) with a red-outlined PSU module and a red-outlined LED strip. The PSU module has a red circle with a lightning bolt and a red circle with a plus sign. The LED strip has a red circle with a lightning bolt and a red circle with a plus sign. The LED strip is connected to a terminal block with terminals labeled DA-, DA+, N, and L. A legend in the top right corner shows a light bulb icon and a triangle with "DIM 4".

7

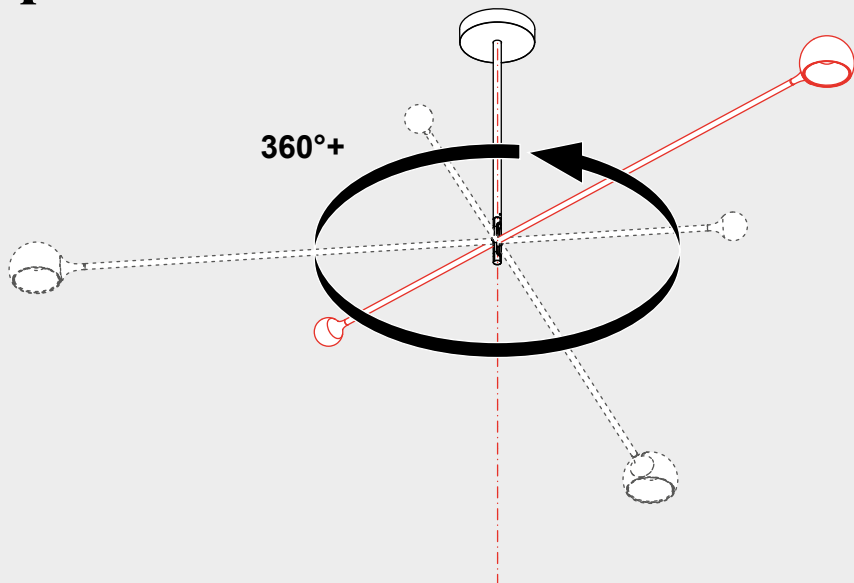

A diagram showing a top-down view of a circular device. A large, light-gray circular plate is being pushed upwards along a central vertical rod. A large black arrow points upwards from the rod, indicating the direction of movement. Above the plate, the internal components of the device are visible, including a motor, gears, and various small parts.
