

Reire

➤ Reggio Emilia, Italy

➤ Year / 2024

Category / Office
Author / GMRT Associati & Cacciavillani
Photo / Michele Nastasi

Reire's office lighting project transformed the space into a modern and functional environment, thanks to a lighting design aimed at optimising comfort and productivity. The choice of specific optics for the workstations ensures **uniform, glare-free lighting, promoting concentration and well-being**. The integration of natural light with our solutions is designed to preserve the open atmosphere and enhance the architectural features, such as the wooden trusses and glazed volumes of the meeting rooms.
