In the heart of Brescia's historic center, this private residence embodies a refined and contemporary elegance. The lighting design was conceived to harmonize with the minimalist character of the interior furnishings and finishes, using a coherent and sophisticated language. The distinctive element is the use of the **Turn Around** recessed track, chosen as a unifying thread throughout the home. Combined with **Vector 40** spotlights for accent lighting and the diffused LED strip of Turn Around for a soft, uniform glow, the system creates a warm and dynamic atmosphere. In the night area, the corridor is enhanced by **Everything 80** recessed fixtures, ensuring visual comfort and design continuity. A project that highlights the versatility of our systems for residential interiors.
