In a historic guesthouse overlooking the river, the renovation project by **Monoplan** transforms the building into a modern apartment hotel with a distinctive identity. The architectural concept interprets the dialogue between the mountain landscape and the lakeside scenery, giving shape to individually designed holiday apartments with modern bespoke furnishings.

In this context, Artemide contributes to defining a welcoming and contemporary atmosphere through a selection of lighting solutions that accompany the different areas of the project. The **Sylt**, **Gople** and **La Linea** families create a coherent language between private areas and shared spaces, from the functional light of the apartments to the more relaxed atmosphere of the lobby and café. An intervention in which light enhances the identity of the interiors and contributes to the quality of the experience.
