VOX Dimensions refer to various edges of what we call reality. We consider four dimensions as our day to day ambient: length, width, depth of all objects in the Universe and their motion in time. But in addition to visible planes we assume existence of others...

VOX Dimension is an alternative reality coexisting with ours where everything works and happens in another way. VOX Dimensions concept aims to change the reality, to free off the boundaries and finally to transfer to the parallel bright flexible dimension never seen before.
