MC A - Mario Cucinella Architects has inaugurated its new Milanese offices in via Poma 52: 800 square metres on three levels, in a former factory from the 1930s, the external façade of which has been maintained and the interiors totally redeveloped.
The opening of the new offices is a confirmation of the importance that the City has always had for the Studio.
The interiors of the offices are characterized by balconies that overlook a central void sky-ground that from level -1 reaches, thanks to the large skylight, the garden terrace, each of these floors is illuminated with Artemide products.

"With the new offices we have created a place able to represent the multiplicity of MC A, inaugurating a space that wants to be the heart of an ecosystem composed of colleagues, partners, customers, suppliers and friends. It is a place that speaks of sharing, research, care for the environment and creativity"
Mario Cucinella
