Artemide

In the project that transformed a showroom into the new offices of Fiditalia, company active in consumer financing, the studio Eidomatica chose **Alphabet of Light System** as the main element to create a dynamic and contemporary space and to create continuity between the individual operating spaces.
The light path is a luminous sculpture that runs above the rooms without solution of continuity and that, thanks to the transparent glass partitions, grows in a continuous game of reflections.
The circular light elements act as autonomous decorative elements, while visual comfort on the worktops is ensured by A.39 direct-emission.
