Artemide lights up Culligan's new Italian headquarters, designed by Open Project, with its innovative **La Linea** and **Alphabet of Light** solutions. These lighting systems combine technological innovation, flexibility, and sustainability, seamlessly integrating into the fluid and dynamic spaces of the project, inspired by water and well-being. La Linea, with its ability to follow free and complex geometries, and Alphabet of Light, with its modular and curvilinear language, enhance the design of the interiors, creating a perfect balance of functionality, comfort, and corporate identity.
