Elemental

Artemide[®]

Authors Elemental

ELEMENTAL is a Do Tank founded in 2001, led by Pritzker Prize 2016 Alejandro Aravena and partners Gonzalo Arteaga, Juan Cerda, Victor Oddó and Diego Torres.

ELEMENTAL's work stands out for engaging in projects that range from housing to public space, from objects to buildings, covering a wide spectrum of interests. Their unbiased approach to a given question enables the office to enter fields they haven't explored before, generating an original contribution to people's quality of life.

“O is an attempt to reconcile the needs of the natural and the urban environment. Darkness and disappearance will be the contribution of O to nature and public spaces.”

“O”

Elemental 2018

“O” is an essential element which, when switched off, frames nature and suggests perspectives, constituting an unobtrusive object in space that in no way alters the existing balance.

Introduced in 2018 in the ground and suspended outdoor versions, today it is a perfect lighting appliance for indoor use too, thanks to a cabled option that allows easy relocation. In this case too, the IP protection grade remains suitable for outdoor use. Its lightness is not just formal: its thin aluminium profile is an element in its own right, which can be moved wherever needed, allowing multiple uses and creating a pleasant ambiance anywhere with its soft, non-glaring light. As well as the original 90-cm diameter version, “O” is developed in a smaller, 45cm version and today also in a larger 150cm model. “O” is thus an increasingly comprehensive family of elements that can be used to create dynamic lightscapes.

Nature

The more the planet becomes urban, the more we appreciate the value of natural spaces. The cities offering the best quality of life are those that were visionary enough to keep portions of untouched nature within their footprint and transform them into public spaces. The problem is that the forces which govern nature and modern urban life, even if guided by good will, tend to pull in opposite directions.

One of the strongest intrusions in the natural order (and yet one of which remains almost unnoticed) is the disappearance of darkness in our cities. In the attempt to make parks safe, we not only invade them with poles and cables; but we forever alter the circadian rhythm, which is crucial for the existence of species, both animal and vegetal.

Our strategy is twofold: on the one hand, it is to design a light for public spaces that can be as imperceptible as possible when it is not used; light without a lamp.

On the other hand, it is to use different types of sensors so that light appears just when needed, light only on demand.

Elemental, 2018

From Outdoor to indoor

“O” can be fixed on the floor for outdoor installation with IP67 but is available also a version with plug (IP44/ IP67) perfect for indoor and outdoor application.

“O” Family

Materials:

extruded and calandered aluminium ring, silicone diffuser

Colours:

black painted

“O”:

Total power: 43W LED
Luminaire flux: 1595lm

“O” 45:

Total power: 19W LED
Luminaire flux: 875lm

“O” 150:

Total Power: 65W
Delivered Luminous Flux: 2850lm

CRI=90

A modern architectural scene at dusk. A dark, minimalist building with a large, glowing 'A' logo and the word 'ATELIER' below it is the central focus. In the foreground, two interlocking rings, illuminated from within, stand on a concrete base. The ground is landscaped with white gravel, dark concrete paths, and patches of green grass. The sky is a deep blue, suggesting twilight.
